

A Place for Marco - Project 2

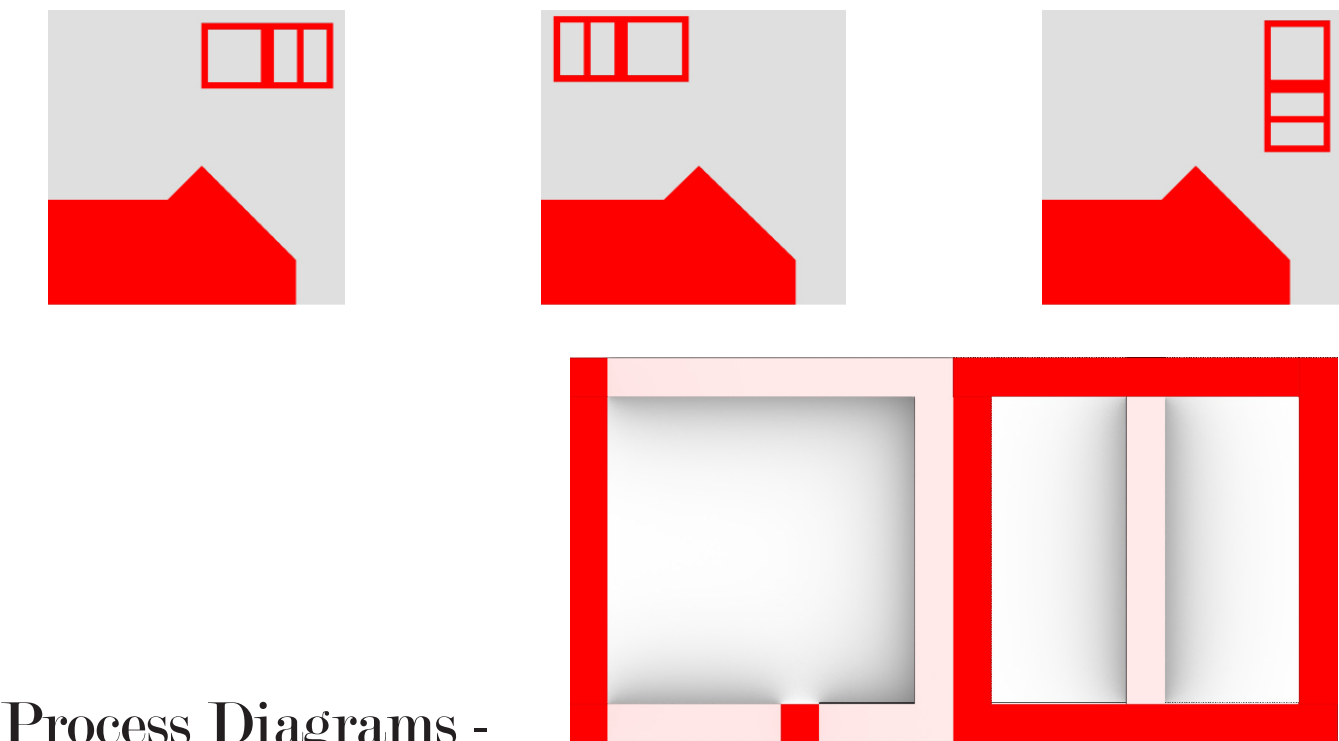

AAS ID Studio 1, Semester 1

Client Information

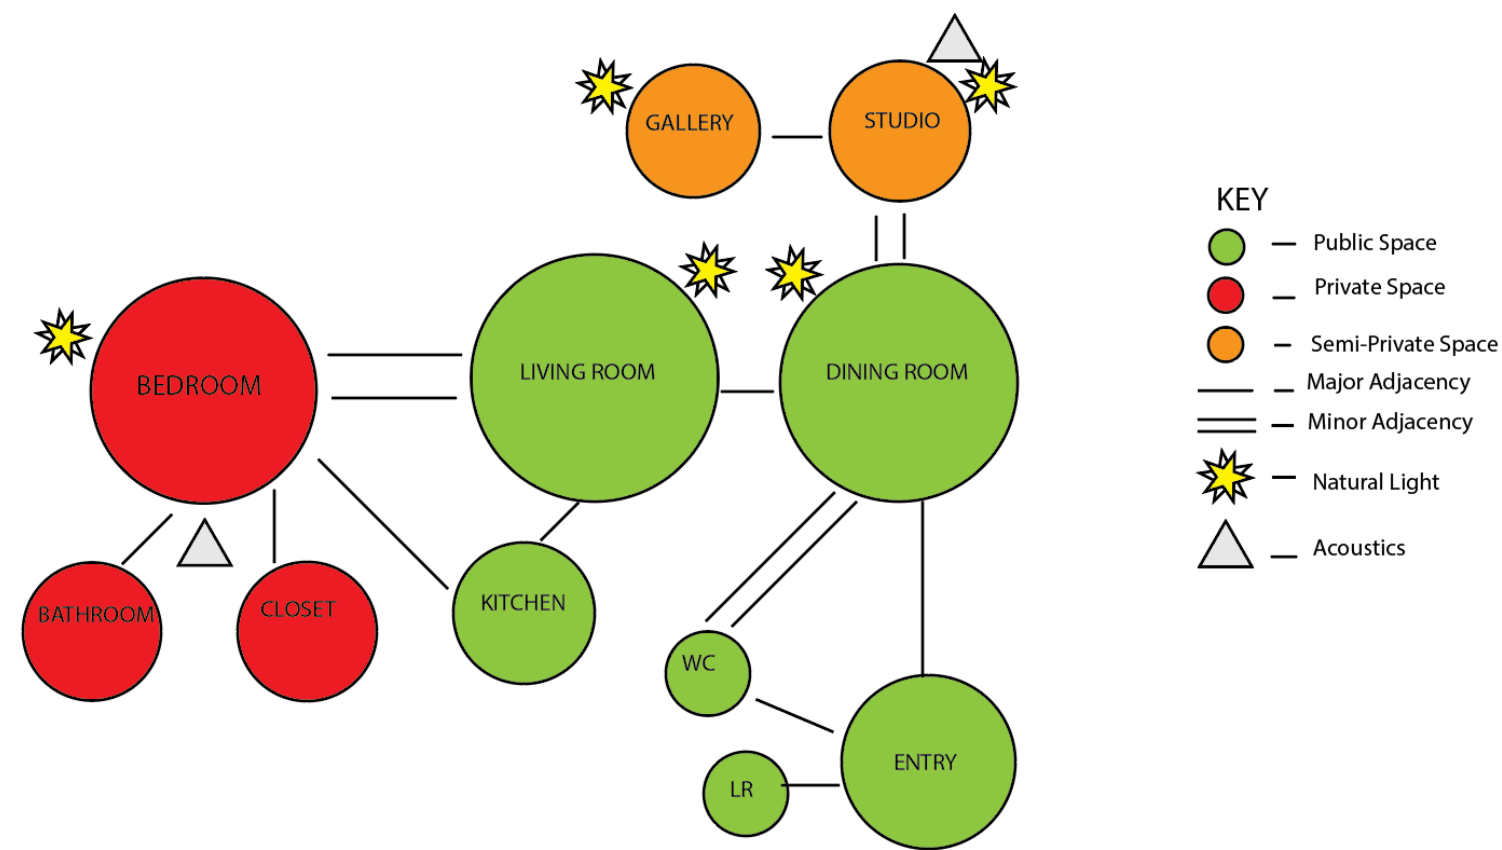

A yong creative, my client - Mr. Glancy - uses his home to create, and to relish in leasure. Being a recognized artist, he needs space to work, but also to decompress from the day-to-day.

Aside from the common ammenities needed for a home, Marco will need room to lounge, to listen to music, and to entertain his guests. In addition, a properly equipped studio and office space, with an attached gallery to display his most precious stippling works. These spaces will be sleek and sharp to accomodate his taste for lavish decor, while maintaining minimalism to encourage uniterupted creative flow.

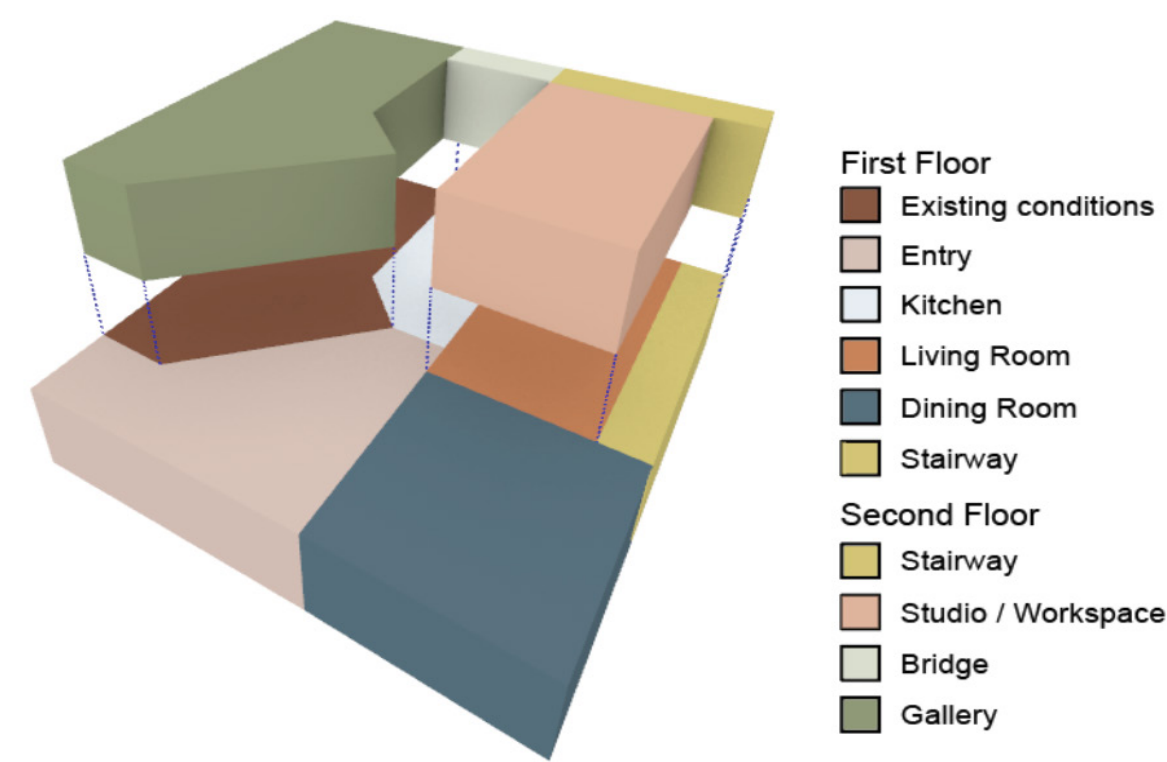

This project will use Sol LeWitt’s “Open Cubes” as structural/architectural components of the design within an existing loft to constrict the extent of useable space.
